

## **AMADA MACHINE TOOLS and AMADA MARVEL to Exhibit at IMTS 2018**

AMADA MACHINE TOOLS CO., LTD. (Isehara, Japan; President: Masahiko TADOKORO) and AMADA MARVEL, INC. (Wisconsin, USA; President: Archie STAM) will exhibit at the International Manufacturing Technology Show 2018 (IMTS 2018) to be held in Chicago, USA, from September 10 (Mon) to 15 (Sat), 2018.

IMTS is one of the very important exhibitions for us, along with EMO in Europe and JIMTOF in Japan, where machine tool manufacturers from around the world exhibit.

AMADA MACHINE TOOLS will exhibit a new model of its carbide circular saw machines, as well as metal cutting and grinding machines, which will contribute to improving productivity, while proposing automated manufacturing solutions that meet customers' needs and presenting the latest technologies.

Marvel Manufacturing, Inc., which has been manufacturing and selling metal cutting machines in North America for over 100 years, joined the AMADA Group at the end of July. It will exhibit at IMTS this year under the new company name AMADA MARVEL. Exhibits include a wide variety of metal cutting machines that meet customers' needs, including its flagship vertical tilt-frame band saws for cutting lightweight structural steels.

### Main machines exhibited by AMADA MACHINE TOOLS

1. Carbide-tipped circular saw machine (World premiere)
2. HPSAW-310 Super high-speed cutting band saw machine/Hyper saw
3. THV-460 Duplex milling machine
4. TECHSTER-84 High-precision forming surface grinder
5. SSR-5 Rotary surface grinder

### Main machines exhibited by AMADA MARVEL

1. 8-MARK-III Vertical tilt-frame band saw machine
2. MSIW60D Ironworker
3. PA360 EPC Horizontal post style saw
